A woman with dark hair and black-rimmed glasses is smiling and looking towards the camera. She is wearing a green button-down shirt. In the background, there is a desk with a computer monitor displaying lines of code, a keyboard, and a small potted plant. The image has a modern, tech-oriented feel with a white curved graphic element separating the text from the bottom right.

Software solutions  
must be individually  
configurable –  
despite uniform  
standards.

Logical. Logistical. LOGSOL.

## RoutMan® – Mastering complex planning tasks with software support

RoutMan® is the planning tool for the material flow in order to use internal resources efficiently.

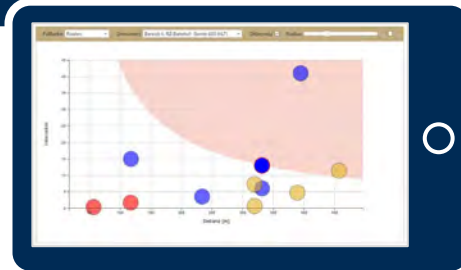

- **Simple** and **fast dimensioning** of internal transport processes
- **Reduction of planning efforts and costs** for product start-ups and/or shifting the order spectrum
- **Standardized planning platform** to avoid knowledge islands and increase the degree of digitalization
- Utilization of **synergy effects** with changed boundary conditions
- **Established calculation** methods according to VDI
- Efficient determination of key figures and **dynamic visualization** of processes
- **Automatic determination** of input parameters for subsequent control

Optimally plan and use resources for internal transportation

 **RoutMan®**

Determination of route guidance, master data library, visualization of hall layouts and much more.

- 3

## One software solution - three usage variants

### Transportation concept planning with LOGSOL using RoutMan®

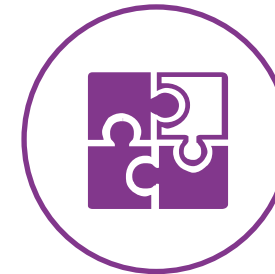

- Analyse der IST-Situation / Datenaufnahme
- Layout and capacity planning
- Planning the supply concept
- Employee needs analysis
- Implementation and implementation support

**Complete package**

### RoutMan® use by a LOGSOL planner

- Joint workshop to analyze the current situation
- Preparation of the raw data provided
- Planning the transportation concept using RoutMan®

**Service package**

### Renting the software for an agreed period

- User training (train-the-trainer)
- Personal service and support

**Software-as-a-Service**

## Benefits of using RoutMan®

**Standardized planning platform**

**Established calculation methods and key figures according to VDI 5586**

**Fast dimensioning of transport processes**

**Efficient scenario evaluation**

**Manufacturer-independent database**

**Flexibility through SaaS model**

## Live-Demo

The screenshot displays the RoutMan software interface for internal transport planning. The main area shows a detailed warehouse floor plan with blue lines indicating planned transport routes. A sidebar on the left contains a menu with options like 'Benutzermanagement', 'Stammdaten', 'Projektmanagement', and 'Streckennetz'. A central overlay with a hand icon and the text 'Watch the video' is present. The bottom right corner features a small image of a yellow forklift. The interface also includes a top navigation bar with various status indicators and a bottom status bar.

**Streckennetz**

Strecke	Streckenpunkte
10	Eintrage
ST-001	P-001 P-002
ST-002	P-002 P-003
ST-003	P-003 P-004
ST-004	P-004 P-005
ST-005	P-005 P-006
ST-006	P-006 P-007
ST-007	P-007 P-008
ST-008	P-008 P-009
ST-009	P-009 P-010
ST-010	P-010 P-011
